

# Avast AntiTrack Premium

Disguise your online identity for greater privacy

## Keep your true identity private

When you're browsing, we disguise your online behavior so no one can build a profile on you.

## Know when you're being tracked

When advertisers try to track your online activity, we automatically expose and block them.

## Stop targeted advertising

When you're shopping online, we hide your purchases so you don't see the same ads.

## VPNs, ad-blockers, and incognito mode are not enough

### VPNs don't stop tracking

A VPN will encrypt your connection, protect you on public Wi-Fi, and disguise your location, but advertisers can still identify you based on your PC and browser settings.

### Ad-blockers break sites

Unlike anti-tracking software, ad-blockers affect the way websites look and work, and they need to be updated to keep up with the constant wave of new ads.

### Incognito mode isn't incognito

Incognito mode prevents cookies, visited websites, and autocomplete fields from being saved, but it can't hide your IP address from advertisers.

## Avast AntiTrack Premium is better

	VPN	AD-BLOCKERS	INCOGNITO MODE	AVAST ANTITRACK PREMIUM
<b>Warns you of tracking attempts</b>				✓
<b>Reveals who's trying to track you</b>				✓
