## Privacy and Security

Protecting users' online security and privacy with award-winning, cross-platform VPN and antivirus products, both free and premium. Plus, private online browsing with the Avast Secure Browser

## Family Safety

Keeping families safe with technologies that can report children's locations to parents and provide control over their online activities. These apps are provided directly through app stores and through telecom carriers.

## Business Security

Safeguarding businesses with top-rated endpoint protection and managed services solutions, including on-premise and cloud security as well as remote management and monitoring tools and services.

## Utilities

Helping users to boost their productivity with cleanup and performance products that optimize their personal computers by removing junk and unwanted files.

## IoT Security

Securing home Wi-Fi networks as well as every smart device connected to them, both directly to consumers and through telecom partners so they can keep their subscribers safe.
