

Avast Secure Browser

Built for your privacy, by security experts

Stay anonymous

We believe that what you do online is strictly your business and no one else's. With our built-in privacy features it stays that way.

Browse faster

Tired of being interrupted by annoying ads? We block them automatically. Less to load means faster browsing.

Protect your data

Supported by the world's best security software, our browser is your first line of defense against web-borne threats.

Be in control

Easily control and manage all your security and privacy features in one place with a built-in Security and Privacy Center.

Avast Secure Browser

What's in it for you

Take control of your privacy

Configure all features from the Security & Privacy Center.

Stop online tracking

Prevent web services from tracking your online activity.

Hide your browser info

Control what information websites know about you.

Browse without interruptions

Stop annoying ads to help webpages load faster.

Block Flash-based content

Block malicious content and save resources.

Secure your personal info

Prevent hackers from stealing financial and personal data.

Encrypt your connection

Force pages to hide data sent to and from your browser.

Stop phishing attacks

Automatically block malicious and fake websites.

Block harmful extensions

Stop malicious or unwanted extensions and add-ons.

Log in easily

Securely store all your details to sign in and pay faster.

Download media files

Save audio and video files from streaming websites.
