

Vladislav Iliushin **IoT Threat Researcher**

Vladislav Iliushin is an Internet of Things (IoT) Threat Researcher at Avast.

Vladislav analyzes the IoT ecosystem and regularly conducts experiments, including experiments around public Wi-Fi security, research around the accessibility and hackability of webcams, and demo hacks of IoT home appliances, to demonstrate their weaknesses and raise awareness around IoT security.

Vladislav has presented at events like SXSW, WebSummit, TroopersConf, and Kaspersky SAS.
